

ANNOUNCING THE CITY OF LAMAR'S ASBESTOS INSPECTION PROGRAM

The City of Lamar is proud to announce a program in which the City of Lamar will pay for the inspection for asbestos of homes that need to be removed or repaired. The funding will be on a first come first served basis as there is only a fixed amount budgeted.

There will be forty applications accepted for bids. We will therefore need a rough sketch with the dimensions of the home in square feet if it is to be removed; or in the case of remodeling, the square footage of the area to be removed. Preference will be given to homes that need to be removed.

The inspection company will need access to the home to be able to submit a bid to the City of Lamar.

The City of Lamar will need proof of ownership of the home and will request a copy of the resulting inspection report. We will require that a general release form be filled out and signed.

Please contact Bob Ward at the City Complex, 102 E. Parmenter, Room B-00 or call 719-336-2085.
